Continuing Education and Non-Certification Courses

How to Pass Certification Exams with Strategic Test Taking!

<https://www.udemy.com/better-testing/?couponCode=GRADUATE>

This course is designed to help you learn "how to study" for certification exams and understand how to pick the right answers come test day. Now, I know that sounds simple, but there is a method to this that many students don't know. You will learn how to study better, take more efficient notes, and most importantly, how to increase your odds of passing your CompTIA, Microsoft, ISC2, or other IT Certification exams on the first attempt by using our tips, tricks, and efficiency gains to your advantage.

Introduction to Malware Analysis for Incident Responders

<https://www.udemy.com/malware-analysis/?couponCode=GRADUATE>

In this course, you will learn how to perform the basics of dynamic malware analysis, a tried and true method of understanding what an unknown binary (malware) is doing on an infected system. You will build your own malware analysis virtual lab to create a safe analysis environment using FlareVM, and then we will perform the analysis on a real-world piece of malware to fully understand the concepts covered in this course.

Risk Management for Cybersecurity and IT Managers

<https://www.udemy.com/risk-management-for-cybersecurity/?couponCode=GRADUATE>

In this course, you will get an inside look at how cybersecurity and information technology (IT) managers determine which projects they will support with funding and which they won't based upon a preliminary risk analysis. Over the past two decades, I have worked in the cybersecurity and information technology realm, fighting for my projects to become funded. Early in my career, I didn't understand why certain projects would be funded and executed, while others wouldn't. What I learned, it all came down to Risk Management by our executives and managers.

WiFi Hacking: Wireless Penetration Testing for Beginners

<https://www.udemy.com/wirelesshacking/?couponCode=GRADUATE>

This course is your complete guide to wireless hacking of WEP, WPA, WPA2, and WPS networks. As my student Philip said, "He takes you through the entire wireless hacking process, from setting up the environment, to making inexpensive hardware recommendations, and not only walks you right through the attacks, but explains but explains the "how" and the "why" behind everything that he is doing."

Anatomy of a Cyber Attack: Beginner Hacking with Metasploit

https://www.udemy.com/anatomy_cyber_attack/?couponCode=GRADUATE

Learn how hackers conduct a cyber attack, from Reconnaissance through Exploitation to Covering their Tracks, and more! Students like Hasan are raving about this course, "Excellent more than 5 Stars!"

Introduction to Cloud Security with Microsoft Azure

<https://www.udemy.com/draft/1886576/?couponCode=GRADUATE>

Do you want to learn about "the cloud", how to secure it, and even how to build your own virtualized networks inside of the Microsoft Azure cloud computing platform? If so, this is the course for you. In this course, you will learn the fundamentals of cloud-based service technologies, as well as how to best secure them. This course is designed for anyone who is new to cloud computing that needs to understand the basics of security and how they are implemented inside a cloud computing platform.
