Customer Feedbacks

★★★★★

We knew that we need tool like this one. And we finally found it. Managing orders faster than ever.

GABRIEL MARTIN
Bistrot Paul Bert, France

★★★★★

They have the best digital menu creator. Together with the QR code generator it is best on market.

ALEXANDRA PAPADOPULOS
Odyssey, Greece

★★★★★

No more 30% fee on food delivery platforms. This is super cheap platforms than saved us ton of money.

Emma Müller
Amador, Germany

★★★★★

Being able to pay directly in WhatsApp, is so great. And the best of all, money goes directly to us.

MAXIM IVANOV
Babushka, Russia

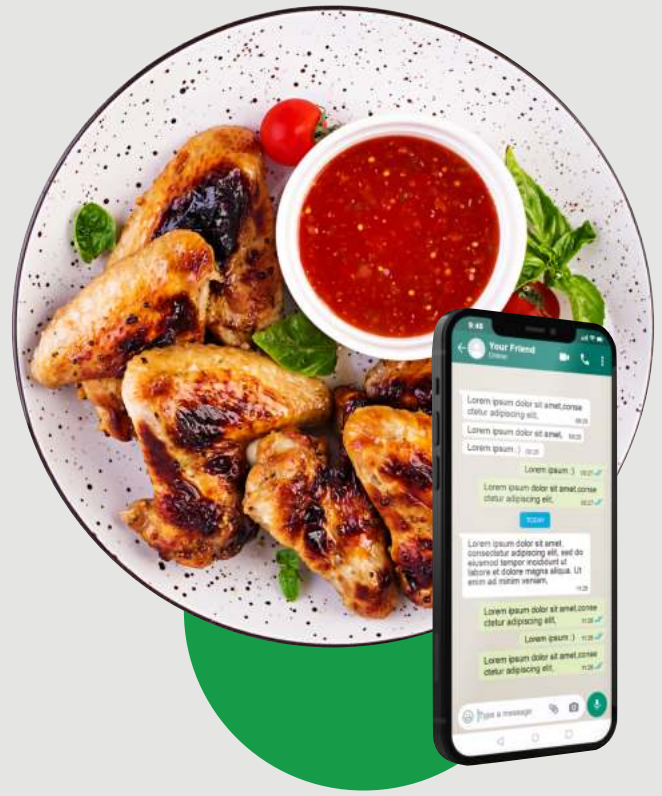

ChoStar Web FoodStore

Create your foodstore business online in a few minutes without any technical knowledge and start selling online.

Use whatsapp as the platform to finalize orders and manage all your orders on one platform.

How it works

- ▶ Create your food menu on our platform.
- ▶ Share your site link or generate QR code to share with your customers.
- ▶ Customers can view your menu and add items to cart.
- ▶ During checkout, a whatsapp chat will be initiated between the customer and the business to close the deal.
- ▶ Manage your orders via the panel and create coupons, enable tracking, enable staff, enable allergens in menu, manage finances, add delivery areas etc.

For Customers ordering:

The customer can find the link to the menu of the business on social media platforms, word of mouth via friend or if they scan the QR. After they make their order with the online menu, they are able to send the order directly to Restaurant's WhatsApp.

For Business owners:

The process starts when they hear a new message sound on their WhatsApp. They, or a trained bot can ask questions for details for order and delivery address. The business owner can also inform how much time will take to deliver the order.

There is no simpler process

**Ordering is easy as
chatting with a friend**

Features

- ▶ **Accept Payments Without Hassle**

- ▶ **Integrate Customer Tracking With Detrack.com**

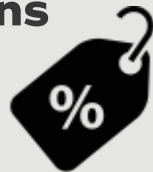

- ▶ **Send Order Status Updates Via Whatsapp**

- ▶ **Use Your Custom Domain**

- ▶ **Add Coupons**

- ▶ **Set Up Different Prices For Different Delivery Areas**

- ▶ **Staff Access**
